

## CLINIQUE KIMBANGU

Clinique Kimbangu is located in the suburban community of Mont Ngafula, just 40 minutes from the center of Kinshasa in a community that has mushroomed due to displaced people from the interior seeking refuge from war, hunger, and poverty. A team of healthcare workers, led by Jose Kisoslokele, started Clinique Kimbangu which serves the disadvantaged while maintaining an extremely high standard of health care. Most of the care given is at a minimal cost or freely to those who cannot afford it.

The Ambassador's Special Self Help Fund allowed the clinic to augment the storage of water at the hospital. This is necessary due to frequent water supply interruptions. The new water reservoir at the clinic allows for high quality service due to a 60% improvement in water access.

The SSHF Coordinator, Becky Ward, visited along with Daniel Viens of the Defense Attache's Office who presented much needed materials for the maternity and neonatal section of the clinic as a gift from the American Military.
